IDENTIFIERS Beef Farmers

ABSTRACT

To improve vocational educational programs in agriculture, occupational information on a common core of basic skills within the occupational area of the beef farmer is presented in the revised task inventory survey. The purpose of the occupational survey was to identify a common core of basic skills which are performed and are essential for success in the occupation. Objectives were accomplished by constructing an initial task inventory to identify duty areas and task statements for the occupation. The initial task inventory was reviewed by consultants in the field, and 279 tasks were identified. A random sample of 77 beef farmers based on the 1974-75 directory of the Ohio Young Farmers Association, Inc. was obtained. Data were collected utilizing a questionnaire. Thirty-five questionnaires were returned of which 30 were usable. A compilation of basic sample background information is presented on the size and type of beef organization, years as a beef farmer, and preparation as a beef farmer. A compilation of duty areas of work performed and work essential for the occupation is given. Percentage performance by incumbent workers and the average level of importance of specific task statements are presented in tabular form.

FOREWORD

The Department of Agricultural Education at The Ohio State University is involved in a major programmatic effort to improve the curricula in education programs in agriculture. One product in this effort is this report of the beef farmer task inventory survey. The data reported were collected as part of a more comprehensive thrust designed to develop a common core of basic skills in agribusiness and natural resources.

It is hoped that the revised task inventory contained in this report will be useful to curriculum developers working for improved occupational relevance in schools. Twenty-seven additional inventories in other occupational areas are also reported from this project.

The profession owes its thanks to J. Rick Byrd, graduate research associate, for his work in preparing this report. Special appreciation is also expressed to Richard Hummel, Executive Vice-President and Treasurer of the Ohio Young Farmers Association, Inc. and Area Supervisor for Vocational Education in Agriculture in Ohio, for his input and help in securing the cooperation of beef farmers throughout Ohio.

J. David McCracken
Project Director

INTRODUCTION

Occupational information is needed to develop and revise vocational and technical education curricula. Teachers and curriculum developers generally determine which skills might be taught in a program based upon teacher expertise, advisory committee input, informal and formal community surveys, and/or task inventories.

The Agricultural Education Department at The Ohio State University has utilized and revised a system for obtaining and using occupational information as an effective aid in planning, improving, and updating occupational education curricula. This report presents the results of a survey of the occupation, beef farmer. The information contained herein may be used by curriculum development specialists, teachers, local and state administrators, and others involved in planning and conducting vocational and technical programs in agriculture.

Purpose and Objectives

The major purpose of the occupational survey was to identify the skills which are performed and essential for success as a beef farmer. The specific objectives of this survey were as follows:

1. Develop and validate an initial task inventory for the beef farmer.
2. Identify the specific tasks performed by the beef farmer.
3. Determine the relative importance of the specific tasks to successful employment as a beef farmer.

Definition of the Occupational Area

The beef farmer usually receives a major portion of his farm income from the beef enterprise. The beef farmer may maintain both a beef brood cow herd and a feeder herd. The specific duties he performs in relation to the beef enterprise usually involve maintaining the herd health, selecting animals, managing the breeding herd program, marketing animals, and formulating feeds and feeding the herd.

Because most beef farmers operate farms where crops are raised, the operational management responsibilities of the beef farmer include more than managing the beef enterprise. The beef farmer is usually responsible for the planting, cultivating, harvesting, storing, and marketing of grain and forage crops. The beef farmer also has a large investment in equipment and buildings and must manage that portion of the beef farm business. The beef farmer must operate equipment and machinery and maintain and repair such equipment. The beef farmer also will be involved in minor building construction and performs maintenance functions on the farm buildings and structures.

METHODOLOGY

Objectives were accomplished by constructing an initial task inventory, validating the initial inventory, selecting a sample of workers, collecting data, and analyzing data.

Initial Task Inventory

Duty areas and task statements for the beef farmer were identified by searching existing task lists, job descriptions,

curriculum guides, and reference publications. Additionally, contacts with several beef specialists at The Ohio State University aided in clarifying the specific responsibilities of the beef farmer. All the tasks that the project staff thought to be performed were assembled into one composite list.

The initial tasks were grouped into functional areas called "Duties".

After the task statements were grouped under the proper duty areas, each task statement was reviewed for brevity, clarity, and consistency. In all, 361 task statements were included in the initial task inventory.

Initial Inventory Validation

After the initial task inventory was constructed, it was reviewed by 14 beef farmers.

The beef farmers were asked to respond to the initial task list inventory by performing the following activities:

1. Indicate whether any of the tasks listed were not appropriate.
2. Add any additional tasks they believed were performed by the beef farmer.
3. Make changes in the wording of tasks to help add clarity to the statements.

The comments from the 14 beef farmers were pooled and needed revisions were made. Two duty areas were combined as a result of the review process. The duty areas relating to the overall management of a beef farm which were not unique to the beef enterprise but common to several production agriculture occupations were removed from the beef farmer questionnaire and incorporated into a separate farm manager (owner-operator) questionnaire.

As a result of the initial task inventory review process, 279 tasks were identified.

Worker Sample Selection

An attempt was made to survey beef farmers from all areas of the state with various size beef operations. A sample of 77 beef farmers was obtained from the 1974-75 directory of the Ohio Young Farmers Association, Inc. using a multi-stage random

sampling approach. The stages used in the sampling approach were local Ohio Young Farmer Association, Inc. chapter and individual member.

Data Collection

A packet of materials was sent to the randomly selected beef farmers. The packet of materials included:

1. A cover letter from the Ohio Young Farmers Association, Inc.
2. A questionnaire printed on yellow.
3. A stamped and self-addressed return envelope.

The beef farmer was instructed to complete the questionnaire and return it in the stamped and self-addressed return envelope by the date specified in the cover letter.

A follow-up of non-respondents consisted of mailing a packet of materials two weeks after the initial mailing. The follow-up consisted of a packet of materials identical to the initial packet except that a cover letter on Ohio State University stationery replaced the cover letter on Ohio Young Farmer Association, Inc. stationery.

Data Analysis

The 35 questionnaires which were returned were checked for completeness and accuracy by the project staff. Information from the 30 usable responses was coded on Fortran coding sheets for key punching. In addition to coding appropriate respondent background information, each specific task statement was coded as to whether it was performed (1 = Task performed by respondent; blank = Task not performed by respondent) and the level of importance of the task (3 = Essential; 2 = Useful; 1 = Not Important). The information was keypunched on IBM cards and verified by personnel at the Instruction and Research Computer Center at The Ohio State University.

The data was analyzed using the SOUPAC computer program and the facilities of the Instruction and Research Computer Center. Consultant assistance for analyzing the data was provided by personnel at The Center for Vocational Education. The SOUPAC computer analysis resulted in the computation of relative frequencies, means, and rankings for each task statement. The results of the computer analyses were printed in tabular form for ease of interpretation.

FINDINGS

Objectives of the study resulted in the compilation of basic sample background information, the determination of tasks performed by the beef farmer, and the identification of tasks essential to successful performance as a beef farmer.

Description of the Sample

Information regarding the performance of tasks and the importance of the tasks to be successful as a beef farmer was obtained from beef farmers across Ohio.

Response to the Survey

A total of 77 questionnaires were mailed and 35 replies were received. This represented a 45.4% rate of return. The response to the questionnaire is summarized in TABLE I.

TABLE I
BEEF FARMER RESPONSE TO THE QUESTIONNAIRE

	N	Percent Of All Farmers In The Survey
Beef Farmers in Survey	77	100.0
Total Returns	35	45.4
Usable Returns	30	40.0
Unusable Returns	5	5.4
Nonrespondents	42	54.6

Size and Type of Beef Operation

Beef farmers from various size beef operations were included in the study. The size of the beef herd was used to assess the size of the beef operation.

Of the 35 questionnaires received, 30 included information regarding the size of the beef operation. TABLES II and III summarize the responses to the question, "How many brood cows and feeder cattle do you have?" Twenty respondents indicated they maintained a beef brood cow herd. The size of the brood cow herd ranged from 10 - 200 cows with a mean size of 40. Twenty-four of the respondents indicated they fed-out feeder

cattle for market. The size of the feeder herd ranged from 11 - 600 feeders with a mean size of 89.4.

TABLE II
SIZE OF OPERATION
(Brood Cows)

Number of Brood Cows	N	Percent of Respondents
0-30	12	60.0
31-60	4	20.0
61-90	2	10.0
91 or more	2	10.0
Total	20	100.0

$\bar{X}$ number of brood cows = 40.0

TABLE III
SIZE OF OPERATION
(Feeder Cattle)

Number of Feeder Cattle	N	Percent of Respondents
0-45	9	37.6
46-90	7	29.2
91-135	2	8.3
136-180	2	8.3
181-300	2	8.3
300 or more	2	8.3
Total	24	100.0

$\bar{X}$ number of feeder cattle = 89.4

Years as a Beef Farmer

Beef farmers with varying amounts of experience in beef farming were included in the study. TABLE IV summarizes responses to the question, "How many total years have you been a beef farmer?" Nine beef cattle farmers or 30% had been beef farmers from 14 - 17 years. Eight beef farmers or 26.7% had been beef farmers from four to eight years. Seven or 23.3% had been beef farmers from 9 - 13 years. Six or 20% had been beef farmers from 18 - 30 years. The range was 4 - 30 years with a mean of 13.2 years.

TABLE IV
TOTAL AMOUNT OF WORK EXPERIENCE IN BEEF FARMING

Years	N	Percent of Respondents
1-8	8	26.7
9-13	7	23.3
14-17	9	30.0
18-30	6	20.0
Total	30	100.0

$\bar{X}$ experience as a beef farmer = 13.2

Preparation as a Beef Farmer

Beef farmers obtained training for their occupation from various sources. TABLE V summarizes their responses to the question, "Where did you receive your preparation for farming?" Thirty beef farmers or 100% indicated they received training on-the-job. Twenty-two beef farmers or 73.3% indicated they attended a high school course to receive training as a beef farmer. Eighteen beef farmers or 60% indicated they had received training as a beef farmer by attending adult education courses. Six beef farmers or 20% had received their training from other sources. Three or 6.7% received training in beef production at technical schools.

Duty Areas of Work Performed by the Beef Farmer

The 279 tasks were grouped under 15 duty areas. Each

TABLE V
SOURCE OF TRAINING RECEIVED AS A BEEF FARMER

Source	N	Percent of All Farmers in Survey
On-The-Job	30	100.0
High School Program	22	73.3
College/University Program	3	10.0
Adult Education Program	18	60.0
Technical Program	2	6.7
Other	6	20.0

respondent indicated whether he performed the specific tasks in his current position as a beef farmer. The percentages of respondents performing each task were averaged for all tasks under each duty area. The mean percentage of incumbents who performed specific tasks in specified duty areas is presented in TABLE VI.

Duty areas of work in which 50% or more of the incumbent workers performed the tasks were:

1. Observing Legal Practices in Cattle Operations
2. Following General Safety Precautions
3. Maintaining Beef Cattle Operations Equipment and Vehicles
4. Using and Maintaining Hand and Power Tools
5. Operating Equipment and Vehicles
6. Constructing and Maintaining Cattle Operation Buildings and Structures
7. Assembling and Installing Cattle Operations Equipment
8. Maintaining Beef Cattle Herd Health
9. Formulating Feeds and Feeding Beef Cattle
10. Marketing and Shipping Beef Cattle
11. Selecting Breeding and Feeder Stock
12. Handling and Disposing of Animal Wastes
13. Handling and Caring for Animals

Duty Areas of Work Essential for
Successful Performance as a Beef Farmer

A level of importance rating was obtained for each task. The respondent could rate the task as essential, useful, or not important for successful performance as a beef farmer. A ranking

of essential was assigned a numerical rating of "3", useful a numerical rating of "2", and not important a numerical rating of "1". The level of importance ratings for each task were averaged for all tasks under each duty area. The average level of importance ratings for the specific tasks in the specified duty areas are presented in TABLE VI.

Duty areas of work which received a 2.0 or higher level of importance rating by incumbent workers were:

1. Observing Legal Practices in Cattle Operations
2. Following General Safety Precautions
3. Maintaining Beef Cattle Operations Equipment and Vehicles
4. Using and Maintaining Hand and Power Tools
5. Operating Equipment and Vehicles
6. Constructing and Maintaining Cattle Operation Buildings and Structures
7. Assembling and Installing Cattle Operations Equipment
8. Maintaining Beef Cattle Herd Health
9. Formulating Feeds and Feeding Beef Cattle
10. Marketing and Shipping Beef Cattle
11. Selecting Breeding and Feeder Stock
12. Breeding Brood Cows and Heifers
13. Handling and Disposing of Animal Wastes
14. Handling and Caring for Animals

Percentage Performance and Level of Importance
Ratings of Specific Tasks

The percentage performance by incumbent workers and the level of importance for each specific task is also presented in TABLE VI.

It is recommended that the results for each specific task be examined by educators and others who are developing educational programs to determine curriculum content for preparing beef farmers. Specific tasks with a high level of performance and a high level of importance rating should be given more emphasis in the educational program than specific tasks with a low level of performance and a low level of importance rating.

Prepare carriers for hauling animals.	86	2.6
Select markets.	96	2.8
Prepare advertising announcements for selling animals	19	1.9
Interpret market reports.	83	2.8
Analyze market cycles	79	2.5
Select appropriate marketing system	71	2.4

TABLE VI (Cont.)

17

PERCENTAGE PERFORMANCE AND AVERAGE RATING OF IMPORTANCE
OF SPECIFIC TASKS

TASK STATEMENTS	Percent Performing	Average Level of Importance
Select truckers	83	2.5
Identify characteristics of USDA grades	63	2.1
Determine affect middlemen and retailers have on producers' prices	43	2.1
Determine whether animals should be held over for another year's income.	83	2.4
Determine most economical weights to market	71	2.6
Calculate shrinkage	73	2.3
Calculate dressing percent.	76	2.4
Estimate market grades.	73	2.3
Develop plan to spread marketing throughout year.	59	2.2
Determine the affect meat substitutes have on prices and demands.	59	2.2
Take pictures of animals for advertising announcements.	39	1.7
Sort animals according to size and weight	86	2.5
Determine when animals are ready to market.	96	2.8
Determine number of animals to load	96	2.7
Evaluate influence grass-fed cattle have on meat prices	56	2.1
Mean Rating	71.2	2.4
Selecting Breeding and Feeder Stock		
Calculate percentage and value of lean and prime cuts found in animals	43	2.0
Determine age of animals.	73	2.5
Establish production goals for culling purposes	46	2.2
Evaluate advantages of various breeds	73	2.4
Evaluate general condition of animals	79	2.6
Evaluate influence of consumers' demands on type of animal to select.	69	2.5
Evaluate overall performance and health records of animals.	73	2.5
Evaluate the degree various traits and characteristics are inherited.	56	2.3
Identify major retail cuts of animals	46	2.1
Identify parts of animals	63	2.3
Identify reputable sources for obtaining stock.	79	2.6
Inspect animals for defects	86	2.7
Inspect animals for desirable traits and characteristics.	79	2.6
Select breeding system to follow.	53	2.4

PERCENTAGE PERFORMANCE AND AVERAGE RATING OF IMPORTANCE
OF SPECIFIC TASKS

TASK STATEMENTS	Percent Performing	Average Level of Importance
Select feeder animals	79	2.7
Select foundation stock	53	2.3
Identify breeds	83	2.6
Mean Rating	66.6	2.4
Breeding Brood Cows and Heifers		
Determine due date for animals	53	2.5
Determine number of bulls needed for brood herd	56	2.5
Determine when to breed	53	2.5
Identify various causes of breeding difficulty	43	2.5
Select a breeding method	43	2.3
Mean Rating	49.0	2.5
Fitting and Showing Cattle		
Fit animals for show	33	1.9
Register animals for show	29	1.8
Show animals	26	1.7
Mean Rating	29.3	1.8
Handling and Disposing of Animal Wastes		
Evaluate how animal wastes decay	50	1.9
Prevent waste runoff from feedlots	76	2.5
Remove dead animals	96	2.9
Remove manure from quarters or pens	93	2.7
Spread manure on fields	100	2.8
Mean Rating	83.0	2.6
Handling and Caring for Animals		
Assist animals in delivering young	59	2.8
Castrate animals	73	2.5
Check animals milk supply	46	2.4
Clean newborn animals	39	2.2

TABLE VI (Cont.)

19

PERCENTAGE PERFORMANCE AND AVERAGE RATING OF IMPORTANCE
OF SPECIFIC TASKS

TASK STATEMENTS	Percent Performing	Average Level of Importance
Dehorn animals.	66	2.5
Determine space needed for animals.	76	2.5
Disinfect and clip naval cord	39	2.2
Evaluate influence of stress on growth and condition of animals.	50	2.3
Exercise animals.	29	2.0
Help young nurse	50	2.3
Identify signs of approaching birth	56	2.5
Identify animals for animals.	56	2.5
Isolate newly purchased animals for observation	89	2.8
Mark animals for identification	66	2.5
Move brood cows to calving pens	19	2.0
Move calves to nursing cows	16	1.8
Move feeder animals into proper feedlots.	83	2.5
Observe animals regularly	93	2.9
Pen animals according to size, weight, and sex.	59	2.4
Remove afterbirth	43	2.3
Remove non-compatible animals	66	2.3
Trim hoofs.	39	1.9
Weigh animals	43	2.0
Bed animals	86	2.7
Prevent animals from stampeding	53	2.3
Mean Rating	55.8	2.4
